

Does the behaviour flow's action cloud cover the data? — cube-single-play
 2-D PCA per panel, fitted on both clouds together; distances in units of $\text{mean}|a| = 0.311$

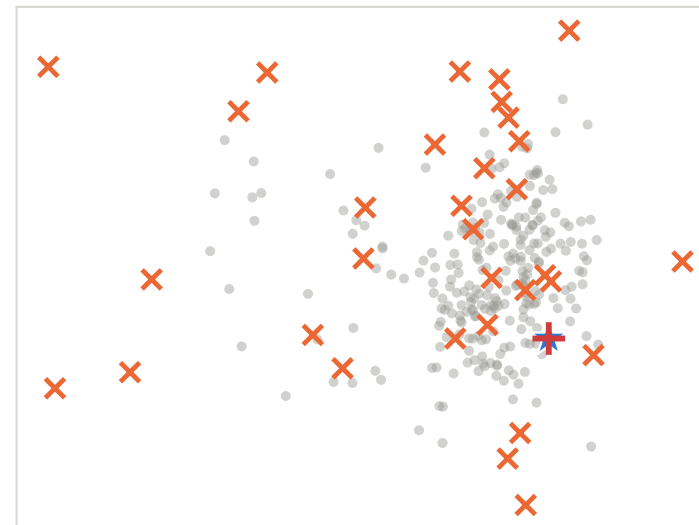

state 850617 best-of-256 to own action: 0.259

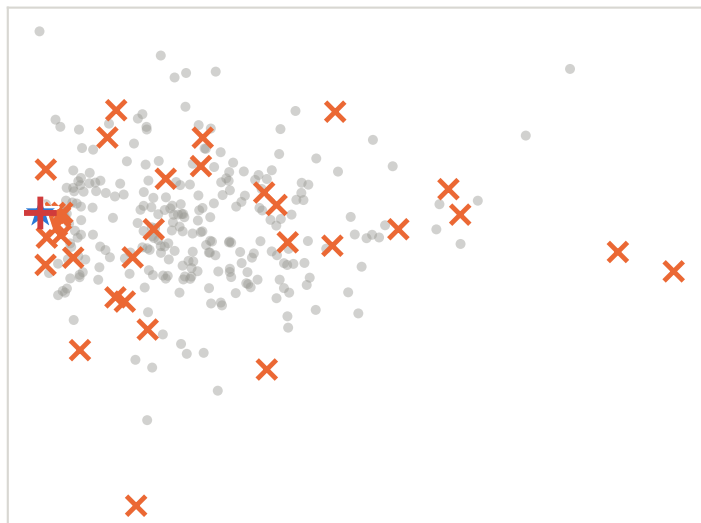

state 636957 best-of-256 to own action: 0.310

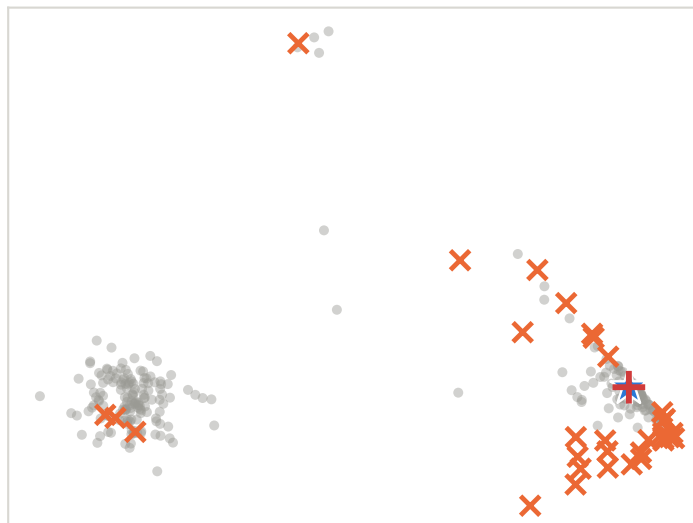

state 511133 best-of-256 to own action: 0.201

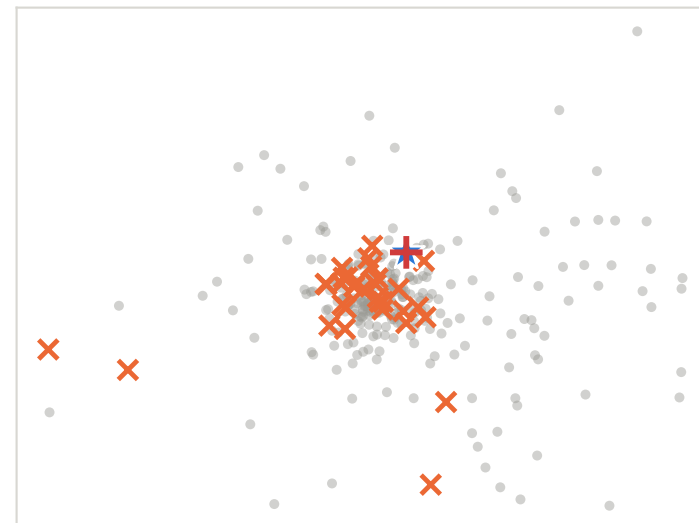

state 307828 best-of-256 to own action: 0.220

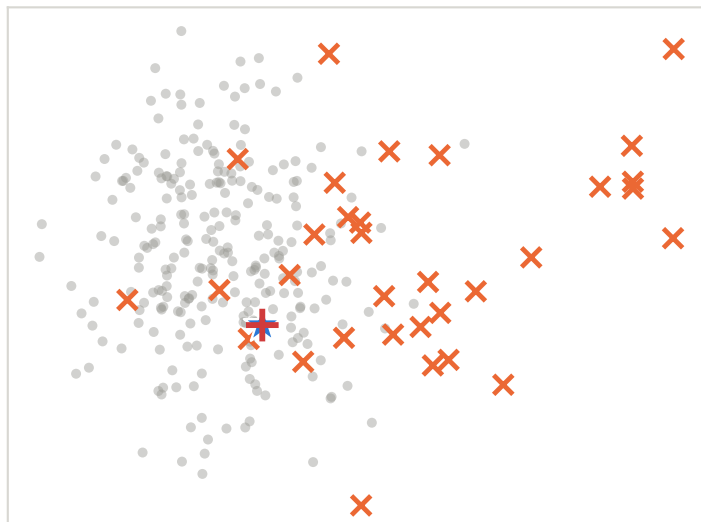

state 175267 best-of-256 to own action: 0.115

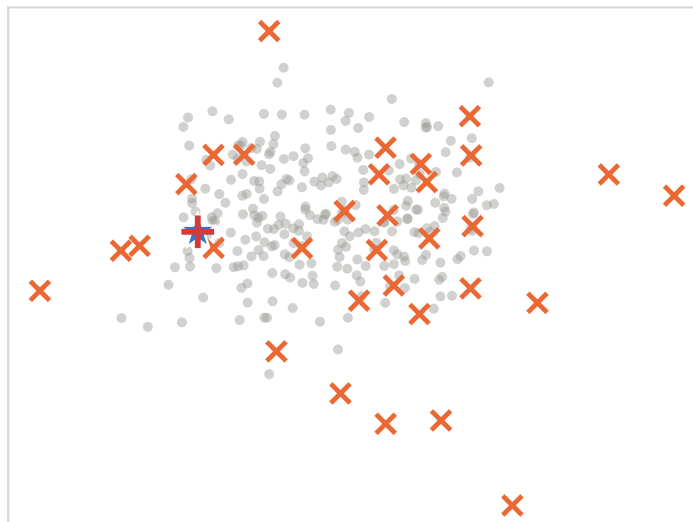

state 269785 best-of-256 to own action: 0.166

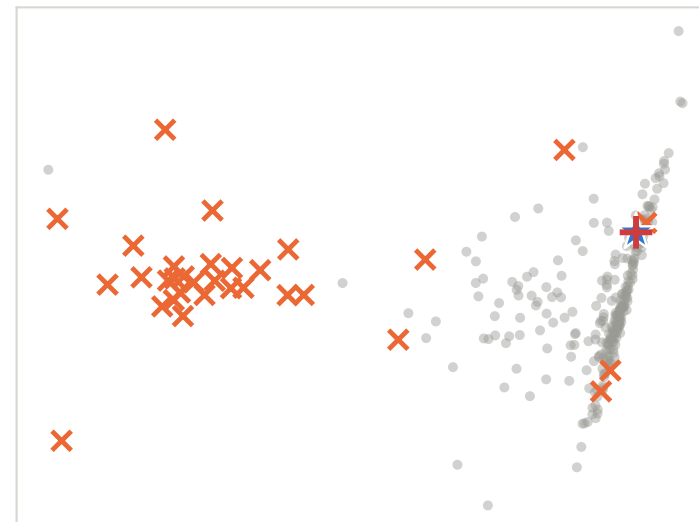

state 75239 best-of-256 to own action: 0.227

state 40973 best-of-256 to own action: 0.373

state 16527 best-of-256 to own action: 0.784

• flow decodes (N=256) × recorded actions, 32 nearest states ★ this state's own recorded action + decode of the exact preimage
